Our Statement

We are very pleased that the data shows that the company has a minimal gender pay gap with women earning more on average than men. Our company policy states that both men and women will receive equal pay on all roles which is reflected in these results.

The mean gender pay gap is (5.60%) and median gender pay gap is (3.70%) which shows that our female average earnings are more than men within the company. This has resulted from 63% of our Head Office positions being made up by women. This is significantly better than the national average which has men earning more than women.

Although the results of our gender pay gap analysis are extremely positive, we will not become complacent. We will keep our own performance in this area under ongoing review and seek to continuously improve the experience of all of our staff in respect of equality, diversity and inclusion.

I confirm that the information in this statement is accurate.
